Wayne Pneumothorax Catheter Set and Tray – Seldinger, Pigtail

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The enlarged sideports are designed to facilitate the drainage of air.
- The radiopaque catheter material enhances x-ray visualization.
- Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.¹
- The catheter comes with a pre-attached, three-way clear plastic stopcock.

Wayne Pneumothorax Catheter Set – Trocar, Pigtail

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

- The needle obturator comes pre-assembled within the Wayne Pneumothorax Catheter to allow for direct-stick insertion.
- The set comes with the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The enlarged sideports are designed to facilitate the drainage of air.
- The radiopaque catheter material enhances x-ray visualization.
- Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.*
- The catheter comes with a pre-attached, three-way clear plastic stopcock.

Procedural video >

Thal-Quick Chest Tube Set

Used for the percutaneous introduction of a chest tube for pleural fluid drainage.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The centimeter-marked dilators allow for additional control over the insertion of a chest tube into the pleural space.*
- The sideports are positioned at the distal end of the chest tube.
- The clear polyvinylchloride catheter with a radiopaque stripe allows fluid to be seen during the drainage procedure.
- The most proximal side hole is positioned on the radiopaque stripe to aid in confirming catheter positioning via x-ray.
- The double lumen set has an additional lumen available for aspiration or infusion.
- The Thal-Quick Chest Tube Adapter is sold separately (see page 18).

*Double lumen dilators are not marked.

Fuhrman Pleural/Pneumopericardial Drainage Set – Seldinger, Pigtail

Used for evacuation of air from the pericardial sac or drainage of air or fluid from the pleural space.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- Sideports are positioned within the catheter pigtail and are designed to aid in drainage.
- Centimeter markings on the pigtail catheter guide insertion.
- The catheter material has radiopaque properties.
- Pigtail catheters have been shown to have a comparable efficacy to chest tubes in patients with pneumothorax.¹

1. Kulvatunyou N, Vijayasekaran A, Hansen A, et al. Two-year experience of using pigtail catheters to treat traumatic pneumothorax: a changing trend. *J Trauma*. 2011;71(5):1104-1107.
